

Actions for Parents/Guardians of Diabetic Student

Inform the principal and school nurse that your child has diabetes upon enrollment in school or if newly diagnosed.

- **Provide emergency contact information**
- **Provide Diabetes Action Plan or medical orders from student's Healthcare Provider**

Attend and participate in meetings with the principal and school health team to discuss, implement the students Diabetic Management.

- **Provide information regarding student's diabetes and diabetic related tasks.**
- **Allow for sharing of students medical information between the school and healthcare providers.**
- **Keep school nurse informed of any changes in students health status**

Provide and replace all supplies and equipment necessary or student's diabetic care.

- **Blood glucose and ketone monitoring kit, insulin, snacks, fast acting glucose and glucagon kit.**

Work with school nurse and school health team to implement written care plans, as appropriate.

Inform school staff (nurse, principal, teachers, coach assistive personnel) when the student plans to participate in before or after school-sponsored activities to ensure health and safety of the student.

- **Understand the federal and state laws that address students with Diabetes**
