

Huntsville Independent School District

Actions for Student with Diabetes

Note: as a student becomes older and more mature, they have a better understanding of diabetes and can take additional responsibility for self management.

- **Know who the school health team members are that will be assisting you with your diabetic care.**
- **(If student is mature enough) participate in school health team meetings to discuss Diabetes Management Plan.**
- **Wear a medical alert ID and carry a fast acting source of glucose and other diabetic supplies needed.**
- **Tell school staff members if you feel symptoms of hypoglycemia or hyperglycemia.**
- **Cooperate with school staff if you need assistance in checking you blood glucose, taking insulin or eating the right amount of food at the correct time during school.**
- **If written plans allow you to: perform diabetes self care activities.**
